Year 6 Sex and Relationships Education

Dear Parents and Carers,

We are about to begin a series of lessons in Science relating to Sex and Relationship Education. The series of 3 lessons with the pupils will last around 45 minutes to an hour per lesson and will focus on puberty and reproduction, understanding and communicating in relationships and conception and pregnancy. For these sessions, the pupils will be split and taught by gender. We will have a question box available for pupils to write anonymous queries, which we will respond to at the start of the next lesson.

On Thursday 5th July - between 3.20pm and 4.00pm - we will be available if parents wish to come into year 6 and look at the materials we will be using for Sex and Relationship Education, prior to these being shared with the children. The resources will be available to look at in Mrs Chappell's classroom. The teachers will also be on-hand if you wish to ask questions or raise any concerns.

Yours Sincerely

Mr M Tomkinson

Mrs E Chappell
