

## Spring Time at Grove Road

Children in Nursery at Grove Road Primary School have been enjoying watching little chicks hatching over the last week. As part of their spring topic they have been learning about and observing the life cycle of chicks. What better way to bring that learning to life than to watch it happening for real!

The children have enjoyed developing their understanding of how to look after the chicks and provide them with the warmth, food and water that they need.

Nursery Leader Sophie Holland commented: "The children have loved observing the hatching process and taking responsibility for looking after the chicks. Being involved in this way really accelerates the learning and helps broaden language and observation skills. It's also lots of fun!"
